

News Hunter

News Hunter

Description

News Hunter is a website where you can collect and organise news into different buckets, as well as browse other user's collections. *(Think Pinterest, but for news)*

Demo (LIVE DEMO)

<https://newshunter-60016913477.development.catalystserverless.in/app/index.html>

If you run into any problems, please start over at the above  url.

Please avoid refreshing when using the app and use just the NavBar for navigation since the entire website is hosted under index.html and when you visit other urls like <https://.../app/mainpage> directly, it throws a 404 error. In the event that you encounter any issues, please start over at the index.html  page.

You can view our source here => <https://github.com/karthiTox/NewsHunter>
